Twenty-two to nothing is the ratio in the battles of Manila and Santiago between the Spanish and American fleets. Beats 16 to 1 all hollow this. It means 22 Spanish men of war lost and no American losses.

Coming events cast their shadow be fore. The free silver papers and the walking delegates on the coinage of free sliver, regardless of the other nations are already velping "war cannot kill the money issue." Their motto is "free silver first and d- the country,"

The free silver question does not both er the people of this territory as much as does the question of a just and equitable assessment of taxes and an energetic and honest collection of the tax levy. That is the burning question in New Mexico just now, free silver notwithstanding.

The Fall of Santiago.

The surrender of Santiago de Cuba by the Spaniards vesterday was a brilliant close of a brilliant campaign against the land forces of Spain. From the moment the American troops landed at Baiqueri the advance on the objective point, the city of Santiago, has not stopped. Position after position has been taken from the enemy and occupied; concealed batteries, superior numbers and heavy artillery have all proved inadequate to stay the fall of the city. The task has been difficult, but it was accomplished, and, is practically at an end. That monarchy nation of Democratic officials, will doubtless attempt to maintain s semblance of hostilities in the vain hope of securing aid from some of the European powers, but the hard fighting is over, and the appearance of a strong American fleet off the coast of Spain will bring peace negotiations in a short

School Lands for New Mexico. The act of congress donating public lands to the territory for school and lishment of permanent reservoirs in the improvement of the Rio Grande river, was approved by the president and became a law on the 21st of June last. In grants of land should be selected by the governor, solicitor general and surveyor general of the terrritory acting as a commission under the direction of the secretary of the interior. Immediately upon the passage of the act and before it was approved, the commission realizing the necessity for prompt action before the desirable lands were taken up. addressed a letter to the secretary of the interior asking for instructions, information, etc., as to their method of organization and procedure under the act. To this he replied, stating that the commissioner of the general land office had been directed by him to take appropriate action in the matter, and on the 9th of structions will at a very early date be prepared for the guidance of the local officers of the several land districts, when you (the commission) will at once be advised in the premises." This was under date of July 5. In the meantime the commission has written to Senator Elkins asking him to see the secretary of the interior and represent the necessity for immediate action, which he wrote he would do. From all this it seems that the commission named in the act has done everything possible to make it available, and that any delay in carryland office at Washington. What the Spanish Priests Can Fall Back On.

(Kennebec Jonrnal.) While ex-President Cleveland's attack ipon what he termed the "imperialist policy," is said to have attracted little or no attention in Washington, the London Globe, one of the few pro-Spanish papers in England, takes occasion to most heartily indorse Cleveland's utter-ances. The intelligent readers may draw inferences.

Teaching Spanish in New Mexico Schools.

(Baton Range.) If New Mexico is ever to become absolutely Americanized, teaching of foreign languages in our public schools will nave to be voluntary instead of compulsory, as is now decided to be the law by the territorial superintendent of education.
